DOYSON

is a Spanish manufacturer of multiroom audio and home automation systems for both residential and commercial.

We offer a wide variety of solutions and attractive designs that cover all background sound, home automation and security needs. This includes advanced alarm functions with sensors and cameras that provide your home or business with maximum security. Control of blinds and awnings, lighting, relays, temperature, connection to telephone and video doorphone, intercom, etc...

All our equipment has a version with BLUETOOTH so you can enjoy your music from any device at any time.

And of course, all this supported by the latest technology and with the maximum guarantee.

The easy installation of our equipment added to the compatibility of our different systems, makes DOYSON the best option for electricians and installers looking for service, warranty and technical support in each of their projects and for each of their clients.

DOYSON has extensive experience in the electrical sector and works in different countries of Central America and Europe, offering a fast and efficient service.

The Series D Sound+Home Automation+Security

THE D500 control module belonging to the SERIES D is an electronic in-wall element designed to cover all the needs of a modern day home.

MAIN FUNCTIONS

- Independent SOUND in each room
- INTERCOM
- Connection to TELEPHONE AND DOORPHONE
- Control of AWNINGS, BLINDS and SHUTTERS
- LIGHTING control
- BOILER control
- ALARM and intrusion sensors
- Connection up to 21 CCTV cameras
- Detection of SMOKE, WATER LEAKS, etc.

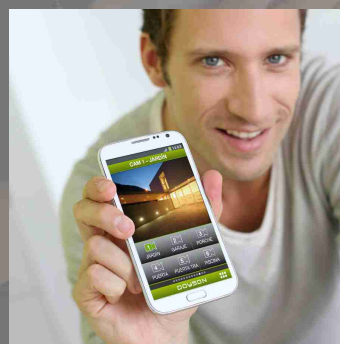

- Custom scene creation
- Presence simulation
- Relay control

EXTENSIVE SYSTEM

DOYSON puts at your disposal a catalog with a complete range of INTERFACES with which you can extend the functions of this system up to the limit of your needs.

COMPATIBILITY

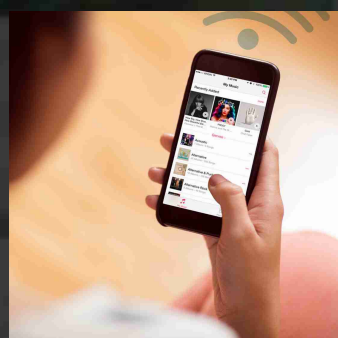

The Series D is fully compatible with the rest of the Series S products, such as keypads and central units. This greatly facilitates the configuration of any installation.

“ It is also available a free DOYSON APP for Android and iOS smartphones for the control of all SERIES D functions that culminates the greatness of this system. ”

BLUETOOTH sound KITS

DOYSON has SOUND KITS WITH FM TUNER AND BLUETOOTH for independent zones that do not require pre-installation.

Series S with BLUETOOTH

All sound keypads of the Series S have a built-in BLUETOOTH connection in addition to many other functions such as:

- Up to 4 audio channels
- Independent FM tuner
- Connection to telephone and video doorphone
- Bidirectional intercommunication up to 128 zones
- BABY-PHONE monitoring function
- Bass, treble and balance control
- Auxiliary audio input and headphone output.

The SERIES S sound keypads offer great benefits in a minimum space (universal box). They are compatible with the vast majority of models of electrical mechanisms through adapters manufactured by DOYSON. This makes this system ideal for installations in homes, hotels, offices, etc.
